

2024 MEMBERS-ONLY

(And Your Friends & Family!)

PERENNIAL PLANT SALE

Plants from the family-owned Van Berkum Nursery

This is truly a special sale since the nursery is not open to the general public. The GGC is fortunate to be able to buy these plants grown in Deerfield, NH and sell them to our members at great prices.

GGC members have raved about the quality of these plants from our previous sales and the fact they are grown in N. H. makes them hardy for our ever-changing weather right from the start!

AND, in addition to the benefit of adding native plants to your garden, your purchase will also help grow the club's educational scholarship fund and support our community education programming.

**For plant selections, photos, descriptions, order form & pricing, visit:
granthamgardenclub.org / SALES & SIGNUPS / 2024 Van Berkum Plant Sale**

Delivery June 5th — Full payment due at time of pickup — Checks & Venmo only

Emailed order forms are preferred and appreciated!

In-person orders accepted at the Friday, March 8th club meeting.

ORDERING DEADLINES: MAIL- Monday, March 11th, EMAIL- Friday, March 15th

1

Amsonia tabernaemontana

\$12.00

Common Name: Tabernaemontana

Family Name: Blue Star Flower

Light Requirements: Sun / Part Shade

Bloom Time: June, July

Spacing: 30"

Height: 18-30"

Bloom Color: Blue

Moisture Level: dry to normal

Animal Resistance: Deer

Type of Perennial: Sun Perennial

Wicked Ruggeds: Yes

US Native: Yes

Plant Description:

Bushy native with willowy appearance and unusual steel blue flowers. Forms a shrub-like clump with gorgeous bright yellow fall color. Easy and long-lived. Zones 3-9.

2

Anemone hupehensis 'Pink Saucer'

\$10.00

Common Name: Saucer

Family Name: Pink Saucer Windflower

Light Requirements: Shade

Bloom Time: June, July, August, September

Spacing: 18-24"

Height: 18-30"

Bloom Color: Pink

Moisture Level: moist to normal

Type of Perennial: Shade Perennial

Plant Description:

One of the earliest summer blooming Anemones, with large rose pink flowers. Vigorous, well-branched and best in moist soils. Zones 4-8.

3 Aquilegia can. 'Little Lanterns'

\$12.00

Common Name: Lanterns

Family Name: Dwarf Wild Columbine

Light Requirements: Sun / Part Shade

Bloom Time: May, June

Spacing: 12"

Height: 8-18"

Bloom Color: Red

Moisture Level: moist to normal

Animal Resistance: Deer & Rabbit

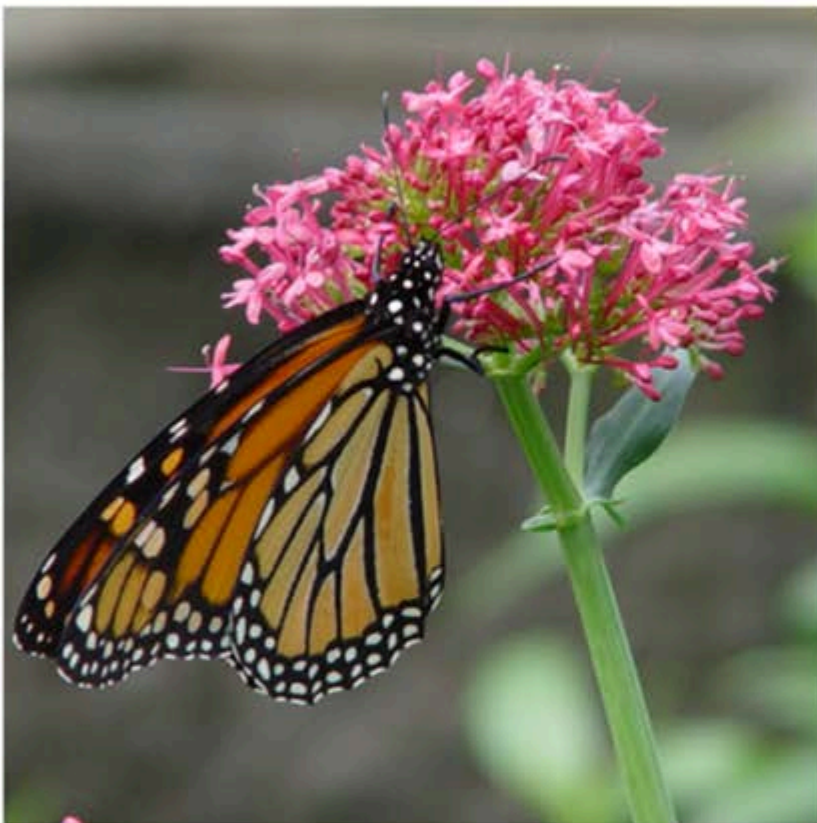

Type of Perennial: Sun Perennial

Cultivar / Nativar: Yes

Plant Description:

This compact selection of our native Columbine has abundant flowers that are more brightly colored than the species but smaller in size. It attracts butterflies, bumblebees and hummingbirds. Zones 3-8

4 Centranthus ruber 'Coccineus'

\$10.00

Common Name: Coccineus

Family Name: Red Valerian

Light Requirements: Sun / Part Shade

Bloom Time: May, June

Spacing: 24"

Height: 18-30"

Bloom Color: Pink

Moisture Level: moist to dry

Animal Resistance: Deer & Rabbit

Type of Perennial: Sun Perennial

Plant Description:

Blue-green leaves, striking fragrant pink flowers, and a lax habit that makes it well suited to cottage gardens. Thrives in lean, well-drained sunny sites; self seeds; a good butterfly plant. Tolerates alkaline soils. Zones 4-8

5 Dalea purpurea

\$12.00

Common Name: Purpurea

Family Name: Purple Prairie Clover

Light Requirements: Sun

Bloom Time: June, July, August

Spacing: 12-18"

Height: 18-30"

Bloom Color: Purple / Lavender

Moisture Level: dry to normal

Animal Resistance: Deer & Rabbit

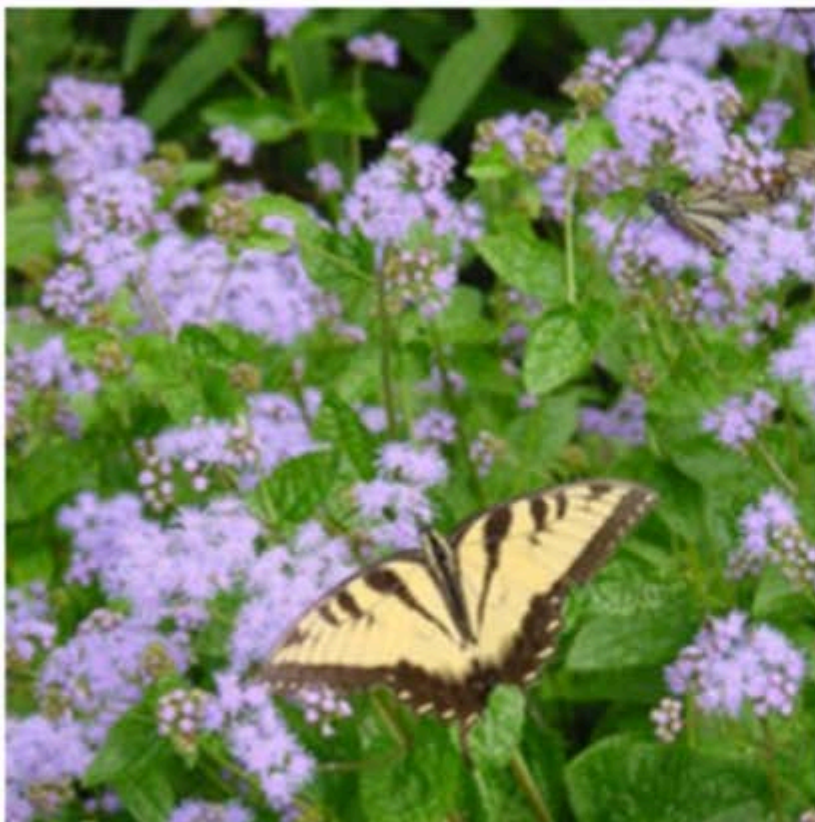

Type of Perennial: Sun Perennial

US Native: Yes

Plant Description:

Native to the central U.S. and has showy cylindrical cones covered with tiny magenta purple flowers. It is great for meadows, rock gardens and naturalized areas. Has a deep taproot and is a great nitrogen fixer. Food source for birds. Zones 3-8

6 Eupatorium coelestinum

\$10.00

Common Name: Coelestinum

Family Name: Blue Mistflower

Light Requirements: Sun / Part Shade

Bloom Time: September, October

Spacing: 12"

Height: 18-30"

Bloom Color: Purple / Lavender

Moisture Level: wet to normal

Type of Perennial: Sun Perennial

New England Native: Yes

US Native: Yes

Plant Description:

This fast spreading native grows 2-3' tall and provides nice contrast in the fall garden. Its bright blue button-like flower heads are graceful and an excellent food source for pollinators. Zones 5-10

7

Gaillardia aristata 'Arizona Apricot'

\$10.00

Common Name: Arizona

Family Name: Blanket Flower

Light Requirements: Sun

Bloom Time: June, July, August

Spacing: 12-15"

Height: 8-18"

Bloom Color: Yellow / Gold

Moisture Level: dry to normal

Animal Resistance: Deer

Type of Perennial: Sun Perennial

Cultivar / Nativar: Yes

Plant Description:

Shades of apricot, yellow, and orange adorn this blanket flower all summer. Forms a tidy mound. Prefers poorer soils, loves the heat and sun, and will not tolerate wet soils. Zone 4-9

8 Ligularia 'Osiris Cafe Noir'

\$14.00

Common Name: Osiris

Family Name: Leopard Plant

Light Requirements: Shade

Bloom Time: July, August

Spacing: 18-24"

Height: 18-30"

Bloom Color: Yellow / Gold

Moisture Level: moist to normal

Propagation: Propagation Prohibited

Animal Resistance: Deer

Type of Perennial: Shade Perennial

Wicked Ruggeds: Yes

Plant Description:

Dwarf selection from Quebec, this variety needs moist soils to do well through hot summers. Foliage emerges dark purple and fades to bronze and olive as season progresses. Golden yellow flowers emerge midsummer.

PP21351. Zones 4-9

9

Lobelia cardinalis 'Black Truffle'

\$12.00

Common Name: Truffle

Family Name: Cardinal Flower

Light Requirements: Sun / Part Shade

Bloom Time: August, September

Spacing: 24-36"

Height: 30-48"

Bloom Color: Red

Moisture Level: wet to normal

Propagation: Propagation Prohibited

Animal Resistance: Rabbit

Type of Perennial: Sun Perennial

Cultivar / Nativar: Yes

Plant Description:

A native cultivar that has dark purple foliage and a bushy upright habit. Dark foliage will have more maroon tones as summer heats up. Likes to have moist to wet soils and a pinch in June will keep it tidy. From Plants Nouveau PP25687. Zones 3-8

10

Penstemon hirsutus LE

Plant Description:

Drooping trumpet-shaped purple flowers on open racemes. Host plant for several species of checkerspot butterflies. Found in a variety of habitats and tolerates medium-wet to dry soils. Zones 3-9

\$12.00

Common Name: Hirsutus

Family Name: Hairy Beardtongue

Light Requirements: Sun / Part Shade

Bloom Time: May, June

Spacing: 10-12"

Height: 18-30"

Bloom Color: Purple / Lavender

Moisture Level: moist to dry

Propagation: LOCAL ECOTYPE

Animal Resistance: Deer

Type of Perennial: New England Meadows

Local Ecotype: Yes

New England Native: Yes

US Native: Yes

11

Scutellaria incana

\$10.00

Common Name: Incana

Family Name: Downy Skullcap

Light Requirements: Sun / Part Shade

Bloom Time: July, August, September

Spacing: 18"

Height: 18-30"

Bloom Color: Purple / Lavender

Moisture Level: average/normal

Animal Resistance: Deer & Rabbit

Type of Perennial: Sun Perennial

US Native: Yes

Plant Description:

Hooded blue flowers bloom for most of the summer. Attracts all types of pollinators. Highly adaptable to many garden situations, and will naturalize. Great cut flower. Zones 3-9

12

Stokesia laevis 'Blue Danube'

\$12.00

Common Name: Danube

Family Name: Stokes Aster

Light Requirements: Sun / Part Shade

Bloom Time: July, August

Spacing: 12-15"

Height: 8-18"

Bloom Color: Purple / Lavender

Moisture Level: moist to dry

Animal Resistance: Deer & Rabbit

Type of Perennial: Sun Perennial

Cultivar / Nativar: Yes

Plant Description:

Long-flowering plant with large lavender blue flowers for late season bloom. Needs well drained soil and does well in hot sites, but will bloom better with moisture. Butterflies love it! Zones 5-9
