

GGC MEMBERS PROGRAM - OPEN TO THE PUBLIC

Native Plants & Ecozone The Sunapee Uplands Friday, April 10th, 2026

Our very own Bill Weeks will educate us about The Sunapee Uplands ecozone and its relevance for us. Why? While many gardeners rely on USDA hardiness zones, that number measures only minimum winter temperatures and overlooks factors like soil, elevation, wind, and drainage. Choosing plants suited to the local ecozone creates more resilient, low-maintenance gardens that better reflect the surrounding landscape. Please join us for this very informative topic.

About the Speaker: Bill Weeks is a Grantham resident and current President of the Grantham Garden Club. Bill is also a Certified Advanced Master Gardener, President of the NH Master Gardener Association, and on the board of the Sullivan County Extension.
